North Jersey Water Conference  
Water Environment Federation

**Experience**

Mr. Holt has nearly twenty years of experience in the study, design, permitting and construction of public and private sector projects in areas covering water and sewer infrastructure, transportation, land development, drainage, recreation facilities, environmental remediation and solid waste disposal facilities.

Mr. Holt joined Suburban Consulting Engineers, Inc., in 1997, and is currently Vice President. In this capacity, Mr. Holt manages the design teams responsible for many of the company's larger design projects. These projects include large site developments, county and local roadway improvements, utility infrastructure improvements, and new utility facilities. Mr. Holt is skilled at implementing a multitude of project management tools, such as resource allocation, budgetary controls, scheduling systems, and quality reviews, aimed at bringing each project to successful completion. Mr. Holt is equally experienced in the regulatory approval process pertaining to large municipal and county projects, and has conducted public hearings and planning meetings in support of these complex projects.

As consulting engineer to several municipalities, Mr. Holt regularly works with other professionals, administrative staff and the general public on a wide variety of engineering projects. Complementing this public sector experience is his extensive experience in working with homeowner associations and communities on their challenging capital replacement projects. This diverse experience background provides a balanced approach for commencing in new projects.

Prior to this position, Mr. Holt was a Senior Project Engineer with O'Brien & Gere Engineers where he participated on the design teams for large-scale water system and solid waste facility improvements projects. As a Senior Engineer with Killam Associates, Mr. Holt worked with several design groups on water treatment, wastewater collection, and storm system infrastructure improvement projects.
